Theory

Similarity between Hypergraphs based on Mathematical Morphology
Isabelle Bloch, Alain Bretto and Aurélie Leborgne .......................... 1

Simplification Operators on a Dimension-Independent Graph-Based
Representation of Morse Complexes
Lidija Comic, Leila De Floriani and Federico Iuricich .........................13

Random tessellations and Boolean random functions
Dominique Jeulin .................................................................25

Discrete set-valued continuity and interpolation
Laurent Najman and Thierry Géraud ............................................37

Solving Problems in Mathematical Morphology through Reductions
to the U-curve Problem
Marcelo Reis and Junior Barrera ..................................................49

Analytical Solutions for the Minkowski Addition Equation
Joel Edu Sánchez Castro, Ronaldo Fumio Hashimoto and Junior Barrera .. 61

Trees and Hierarchies

A comparison of many max-tree computation algorithms
Edwin Carlinet and Thierry Géraud ..............................................73

Constructive links between some morphological hierarchies on edge-
weighted graphs
Jean Cousty, Laurent Najman and Benjamin Perret .........................85

A quasi-linear algorithm to compute the tree of shapes of nD images
Thierry Géraud, Edwin Carlinet, Sébastien Crozet and Laurent Najman ....97

Efficient schemes for computing alpha-tree representations
Jiří Havel, François Merciol and Sébastien Lefèvre ..........................109

### Manifolds and Metrics

**Mathematical morphology for real-valued images on Riemannian manifolds**  
*Jesús Angulo and Santiago Velasco-Forero* ................................................. 277

**A Weight Sequence Distance Function**  
*Benedek Nagy, Robin Strand and Nicolas Normand* ......................... 289

**The Laplace-Beltrami operator: a ubiquitous tool for image and shape processing**  
*Aaron Wetzler, Yonathan Aflalo, Anastasia Dubrovina and Ron Kimmel* 299

### Filtering

**Towards morphological image regularization using the Counter-Harmonic Mean**  
*Jorge Larrey-Ruiz, Rafael Verdú-Monedero, Juan Morales-Sánchez and Jesús Angulo* ................................................................. 314

**A Learning Framework for Morphological Operators using Counter–Harmonic Mean**  
*Jonathan Masci, Jesús Angulo and Juergen Schmidhuber* ................. 326

**Flooding edge or node weighted graphs**  
*Fernand Meyer* ................................................................. 338

**Towards connected filtering based on component-graphs**  
*Benoît Naegel and Nicolas Passat* ........................................... 350

**Inf-structuring functions and self-dual marked flattenings in bi-Heyting algebra**  
*Benjamin Perret* ................................................................. 362

**From Extrema Relationships to Image Simplification using Non-flat Structuring Functions**  
*Guilherme Polo and Neucimar Leite* ....................................... 374

**Two applications of shape-based morphology: blood vessels segmentation and a generalization of constrained connectivity**  
*Yongchao Xu, Thierry Geraud and Laurent Najman* ......................... 386

### Detectors and Descriptors

**Robust keypoint detection using dynamics**  
*Juan Climent and Miguel Angel Cataño* .................................... 398
A Granulometry Based Descriptor For Object Categorization  
Arnaldo Lara and Roberto Hirata Jr. .............................. 409

Qualitative Comparison of Contraction-based Curve Skeletonization Methods  
Andre Sobiecki, Haluk Yasan, Andrei Jalba and Alexandru Telea ........ 421

Detection of Texture and Isolated Features Using Alternating Morphological Filters  
Igor Zingman, Dietmar Saupe and Karsten Lambers .................... 433

Applications

Estimation of separating planes between touching 3D objects using power watershed  
Clara Jaquet, Edward Andò, Gioacchino Viggiani and Hugues Talbot .... 445

Efficient 1D and 2D barcode detection using mathematical morphology  
Melinda Katona and László G. Nyúl ................................. 457

Faster Fuzzy Connectedness via Precomputation  
Filip Malmberg and Robin Strand .................................. 469

Mask Connectivity by Viscous Closings: Linking Merging Galaxies without Merging Double Stars  
Ugo Moschini, Michael H.F. Wilkinson and Scott Trager ................ 477

Discrete Simulation of a Chladni Experiment  
Frédéric Rieux .......................................................... 489

Automatic Quality Inspection of Microfluidic Chips Using Morphologic Techniques  
Thomas Schwarzbauer, Martin Welk, Chris Mayrhofer and Rainer Schubert 501

Geography, Mathematics and Mathematical Morphology  
Christine Voiron-Canicio .............................................. 513
